

BCN Lymphedema Research Fellowship (BLRF)

**Barcelona Lymphedema
Research Group**

BCN Lymphedema Research Fellowship (BLRF)

Lymphedema surgery research is an emerging field that needs to be done to document the prevalence of lymphedema and to help understand its pathology. We also need to do research on ways of preventing this problem and on developing effective treatment options when lymphedema occurs.

The Research Institute and the Department of Plastic and Reconstructive Surgery at Sant Pau University Hospital (Universitat Autònoma de Barcelona) offer a 9-month funded fellowship to join in a lymphedema research project and to specialise in the lymphedema surgical treatment.

Fellowship Director

Prof. Jaume Masia

Scientific Assessment Committee

- Prof **Jaume Kulisevsky** (Research Institute)
- Prof **Jaume Masia** (Department of Plastic Surgery)
- Prof **Jordi Casademont** (School of Medicine – Universitat Autònoma de Barcelona)
- Prof **Sinikka Suominen** (European School of Reconstructive Microsurgery – Helsinki University)
- Prof **Peter Neligan** (University of Washington)
- Prof **Isao Koshima** (Hiroshima University)

Fellowship description

The Fellowship starts yearly the 3rd week of September and runs until the 2nd week of June, exceptionally it could be extended for 6 weeks more. This working period is divided in two main areas:

- Participating in ongoing basic and clinical research or developing some new research projects.
- Following an educational program on lymphedema surgical training for qualified plastic surgeons with microsurgical experience. This training opportunity will provide experience with a broad spectrum of clinical cases, emphasizing the planning and execution of microsurgical solutions for lymphatic disorders. The operative experience can be tailored to meet specific needs/interests of the fellow.

Fellowship Goals

The purpose of this fellowship is to develop a basic science, translational or clinical research project in the area of lymphedema / lymphatic dysfunction. The BLRF also links with other international researchers to conduct joint projects.

Fellow is expected to publish at least two articles in a peer-reviewed journal during the fellowship training program.

Eligibility

Candidates for the Fellowship Program must have completed plastic surgery training in an approved program in the European Union or have had comparable training and experience in foreign hospitals. Applications should be requested 9 - 12 months prior to the start of the fellowship. Must be able to license through College of Physicians of Barcelona. Prior experience in microsurgery preferable and experience in clinical research desirable.

Selection criteria

- Curriculum Vitae
- Two letters of recommendation
- Personal Interview

Fellowship Funds

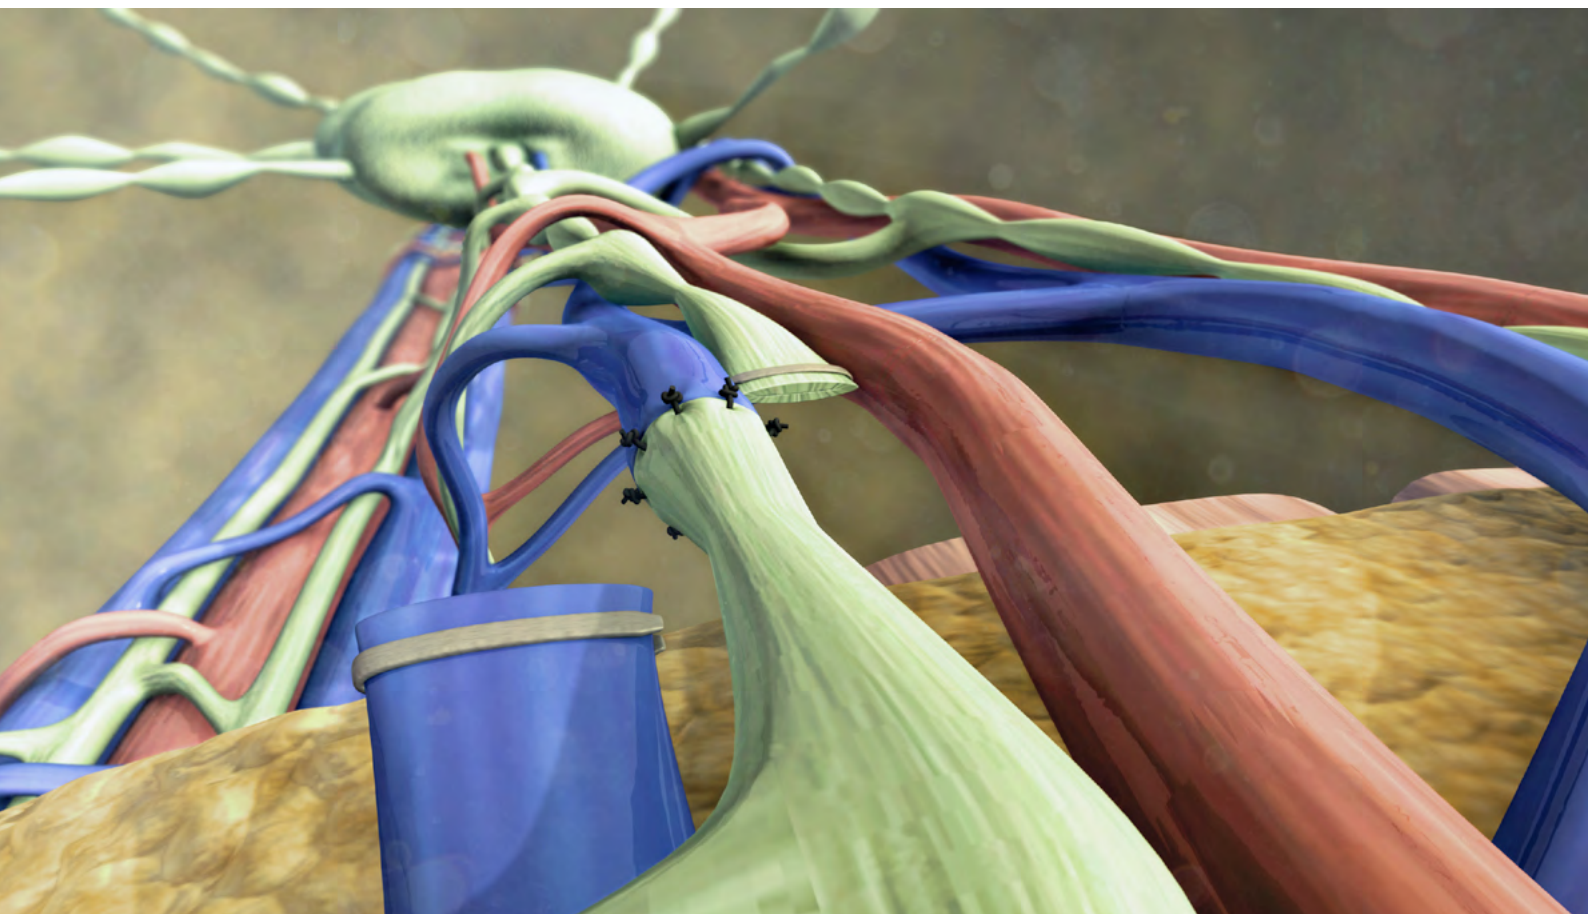

The salary for this position is commensurate with institutional guidelines relative to the educational level of the individual involved (between 12.000 - 20.000 euros).

Timeline

- **15th September 2018:** Applicant registration begins.
- **15th November 2018:** Application deadline for all requirements for application and interview starts.
- **15th December 2018:** Selection results.
- **23rd September 2019:** Fellowship begins.
